EDUCATION

Bachelor of Sciences(Computer Science)
FAST - National University of Computer and Emerging Sciences.
08/2021 - Present

PERSONAL PROJECTS

Health Nexus(FYP)
"Health Nexus" aims to provide a platform that connects individuals with diseases to NGOs and pharmaceutical companies willing to help cover their medical costs.

My E-Commerce Web Application(Red Shop Online)
HTML| Designed and developed the front-end of an E-commerce website using HTML, creating intuitive and visually appealing web pages with seamless navigation between different sections.

Housing Societies Management System
Using Java, MongoDB, Bootstrap, and basic HTML and CSS, I designed this as a semester project.

Model the retirement plan of a Bank Manager(Semester Project)
MATLAB| Utilized differential equations in MATLAB to model a retirement plan for a Bank Manager, incorporating factors such as savings, interest rates, and expenses to generate a comprehensive financial plan.

Advance NotePad
C++| Developed an advanced notepad using C++ language that includes plagiarism detection and word suggestion features, enhancing the user's writing experience.

Parking Management System
Assembly Language 8086 | Developed The Parking Management System by using the basic concepts of the Assembly language.
